RE: Permit # ACT 015-032
Genwal Coal Company
NOV 90-17-4-2

Dear Mr. Kunzler:

This letter is a follow-up of our September 27, 1990, telephone conversation, and your site visit to Crandall Canyon Mine September 26, 1990. Please be advised that this is in response to Genwal Coal Company's NOV 90-17-4-2 violation 1 of 2.

DD-4: As per our telephone conversation, the construction of high walls around the substation facilities is on-going at this point in time; therefore, Genwal requests a three week extension on the abatement of re-establishing the ditch below the retaining wall.

The contractor over this project has had difficulties and has not been able to complete this project within the time frame allotted on this violation. As soon as the construction around this area is completed, the approved drainage will be established in order to satisfy this abatement.

DD-8: It was just this morning that I read the letter from Rick Summers granting approval of the cement barrier from the substation to the mine portal. This barrier will be installed and gravel laid on the road in a manner to create the desired diversion along the access road going to the portal.

Again, I am requesting a three week extension on this project to construct the cement barrier and to lay the gravel. When this project is complete the approved drainage will be established for this area also.
